## **About the Author**

James N. Butcher was born in West Virginia. He enlisted in the Army when he was 17 years old and served in the airborne infantry for 3 years, including a 1-year tour in Korea during the Korean War. After military service, he attended Guilford College, graduating in 1960 with a BA in psychology. He received an MA in experimental psychology in 1962 and a PhD in clinical psychology from the University of North Carolina at Chapel Hill. He was awarded Doctor Honoris Causa from the Free University of Brussels, Belgium, in 1990 and an honorary doctorate from the University of Florence, Florence, Italy in 2005. He is currently professor emeritus in the Department of Psychology at the University of Minnesota. He was associate director and director of the clinical psychology program at the university for 19 years. He was a member of the University of Minnesota Press's MMPI Consultative Committee, which under-took the revision of the MMPI in 1989. He was formerly the editor of Psychological Assessment, a journal of the American Psychological Association, and serves as consulting editor or reviewer for numerous other journals in psychology and psychiatry. Dr. Butcher has been actively involved in developing and organizing disaster response programs for dealing with human problems following airline disasters. He organized a model crisis intervention disaster response for the Minneapolis-St. Paul Airport and organized and supervised the psychological services offered following two major airline disasters: Northwest Flight 255 in Detroit, Michigan, and Aloha Airlines on Maui. He is a fellow of the American Psychological Association and the Society for Personality Assessment. He has published 55 books and more than 200 articles in the fields of abnormal psychology, cross-cultural psychology, and personality assessment.

Jill M. Hooley is a professor of psychology at Harvard University. She is also the head of the experimental psychopathology and clinical psychology program at Harvard. Dr. Hooley was born in England and received a B.Sc. in Psychology from the University of Liverpool. This was followed by research work at Cambridge University. She then attended Magdalen College, Oxford, where she completed her D.Phil. After a move to the United States and additional training in clinical psychology at SUNY Stony Brook, Dr. Hooley took a position at Harvard, where she has been a faculty member since 1985.

Dr. Hooley has a long-standing interest in psychosocial predictors of psychiatric relapse in patients with severe psychopathology such as schizophrenia and depression. Her research has been supported by grants from the National Institute of Mental Health and by the Borderline Personality Disorder Research Foundation. She is currently using fMRI to study emotion regulation in people who are vulnerable to depression and in people who are suffering from borderline personality disorder. Another area of research interest is non-suicidal self-harming behaviors such as skin cutting or burning.

In 2000, Dr Hooley received the Aaron T. Beck Award for Excellence in Psychopathology Research. She is currently the president of the Society for Research in Psychopathology. The author of many scholarly publications, Dr. Hooley is an Associate Editor for Applied and Preventive Psychology. She also serves on the editorial boards of several journals including the Journal of Family Psychology, Family Process, and Personality Disorders: Theory, Research and Treatment.

At Harvard, Dr Hooley has taught graduate and undergraduate classes in introductory psychology, abnormal psychology, schizophrenia, mood disorders, psychiatric diagnosis, and psychological treatment. Reflecting her commitment to the scientist-practitioner model, she also does clinical work specializing in the treatment of people with depression, anxiety disorders, and personality disorders.

Susan Mineka, born and raised in Ithaca, New York, received her undergraduate degree magna cum laude in psychology at Cornell University. She received a PhD in experimental psychology from the University of Pennsylvania, and later completed a formal clinical retraining program from 1981–1984. She taught at the University of Wisconsin-Madison and at the University of Texas at Austin before moving to Northwestern University in 1987. Since 1987 she has been Professor of Psychology at Northwestern and since 1998 she has served as Director of Clinical Training there. She has taught a wide range of undergraduate and graduate courses, including introductory psychology, learning, motivation, abnormal psychology, and cognitive-behavior therapy. Her current research interests include cognitive and behavioral approaches to understanding the etiology, maintenance, and treatment of anxiety and mood disorders. She is currently a Fellow of the American Psychological Association, the American Psychological Society, and the Academy of Cognitive Therapy. She has served as Editor of the Journal of Abnormal Psychology (1990–1994). She is currently serving as an Associate Editor for Emotion, and is on the editorial boards of several of the leading journals in the field. She was also President of the Society for the Science of Clinical Psychology (1994–1995) and was President of the Midwestern Psychological Association (1997). She also served on the American Psychological Association's Board of Scientific Affairs (1992–1994, Chair 1994), on the Executive Board of the Society for Research in Psychopathology (1992–1994, 2000–2003), and on the Board of Directors of the American Psychological Society (2001–2004). During 1997–1998 she was a fellow at the Center for Advanced Study in the Behavioral Sciences at Stanford.

**ALERT:** Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products.

## **Packages**

Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase.

## **Used or rental books**

If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code.

## **Access codes**

Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase.

--

The most authoritative and comprehensive text in Abnormal Psychology, now with DSM-5 coverage throughout.

The esteemed author team of Jim Butcher, Jill Hooley, and Sue Mineka offers students the most thoroughly researched, engaging, and up-to-date explanation of psychopathology, creating a learning experience that provokes thought and increases awareness. By adopting a comprehensive bio-psycho-social perspective, this text takes students to levels of understanding that other books do not offer.

The 16th edition of Abnormal Psychology reflects the revision of the Diagnostic and Statistical Manual (DSM-5). Hundreds of new references have been added to reflect the ever-changing field of abnormal psychology.

MyPsychLab is an integral part of the Butcher / Mineka / Hooley program. Key learning applications include MyPsychLab video series with new virtual case studies.

## **Teaching & Learning Experience**

- **Personalize Learning** - MyPsychLab is an online homework, tutorial, and assessment program. It helps students prepare for class and instructor gauge individual and class performance.

- Explore Research – The authors present their diverse research interests in an exciting way that provokes thought and increase awareness.
- Improve Critical Thinking – Review questions at the end of major sections within the chapters provide opportunities for self-assessment and reinforce learning.
- Engage Students – Most chapters begin with a Case Study to engage students' attention right from the outset.
- Support Instructors – A full set of supplements, including MyPsychLab, provides instructors with all the resources and support they need.

Aaron M. Vedock

By Aaron M. Vedock

This is IMHO, hands-down the authoritative text on Abnormal Psychology today. We used the 11th edition in my graduate school psychopathology, and I recently purchased this updated edition, with all of the DSM-V changes added. Looking forward to re-reading this text once again. It serves as a "go-to" reference, which I keep on my office desk at all times. One down-side, they no longer publish the "study guide" that accompanied previous editions, wish they would bring that back in future editions.

5 of 5 people found the following review helpful.

14 ed Abnormal Psychology

By Bonnie Leigh

The 14th edition is an excellent text for Abnormal Psychology or Behavior Pathology. Its cross reference to

the DSM-IV-TR is up to date and current with the most recent research on all of the DSM-IV-TR disorders. I do not recommend purchasing an earlier edition, because this has so much more detail and illustrations especially the most recent brain biology. Abnormal Psychology (14th Edition)

5 of 6 people found the following review helpful.

Average but too much fluff

By Patrick Estes

Material in book was pretty good overall, and I liked how they had chapter summaries, and sections dedicated to updates/advancements in the field. The negative thing about this textbook is that the print is so small it made my eyes hurt reading it and there was too much fluff. The chapters took forever to read and with all the fluff it made it nearly impossible to skim.
