## Review

"The organization and format of the book works well for my particular use, it builds nicely and is broken into logical sections similar to coursework taught at our college. The book is broad and thorough enough for readers to explore deeper into a given area if necessary. This book is one that I would recommend to others and it is currently the text used for two of our core first-year courses. Furthermore, students are encouraged to keep this text for use and reference during their second year as it is relevant for other courses...All in all, this book is a remarkable accomplishment."

The exact text book that I needed

By Keith\_Dani

This was the exact text book that I needed. And it was much cheaper than at the school bookstore. And for anyone who is looking for an instructional book on how to frame a building, this is a great book for you. It gives you all the info you need to learn the basics of framing and to get started on a project of your own.

Excellent Book!

By Long Dong Silver

This book is AMAZING! I was looking to construct a safe haven in my basement for some fugitives I currently harbor. The cops always are nosing around my place, but thanks to this miracle, I won't have to worry about them. I drafted up the plans for the concealed room and put this book's knowledge to work. The section on ventilation really helped out in disbursing the strong aroma from the meth lab that is adjoined. I already have plans to add the child-labor wing on the south side. This is an excellent source of tips and techniques when designing your own self-help project. My wife wasn't really a big fan of the pleasure dungeon I just finished up, but a plentiful supply of chloroform and a zippered bag over her head for a few weeks sure changed her mind. She doesn't complain at all now.
