Among guides you could enjoy now is NUTR (with NUTR Online, 1 Term (6 Months) Printed Access Card) (New, Engaging Titles From 4LTR Press) By Michelle McGuire, Kathy A. Beerm below.

About the Author

Dr. Michelle "Shelley" McGuire teaches in the Department of Food Science and Human Nutrition at Washington State University. She is the author of several published articles, and specializes in the research of understanding of how breastfeeding and lactation influence both maternal and child health and well-being. Recent research has focused on investigating how maternal diet influences milk fat content and, thus, energy intake and fatty acid consumption of the breastfeeding child. Dr. McGuire has been teaching the basic nutrition course for several years and has a strong appreciation of the course, its goals and objectives, and the variety of student needs. This experience coupled with her strong writing and research background has helped her create an exciting and refreshing text for the introductory nutrition course.

Dr. Beerman teaches in the School of Biological Sciences at Washington State University. She is the author of several published articles assessing the impact of bioactive components in soy (isoflavones) on health parameters in menopausal women. More recently, she has been studying the prevalence of iron deficiency anemia in rural, impoverished regions of Guatemala, and efficacy of a novel approach to improve iron status in women and children. Dr. Beerman teaches the 300-level nutrition course for health-related majors (Nutrition, Health, and Disease), as well as courses related to women's health (Biology of Women). She also teaches a course in teaching methodology (Teaching Methods in Higher Education) for graduate students. Since joining the faculty at Washington State University in 1989, she has taught more than 12,000 students and has been the recipient of several college and university teaching awards. Dr. Beerman's years of teaching experience, combined with her wide knowledge base in nutrition, health sciences and educational pedagogy, has helped create this innovative introductory nutrition text.

Very Satisfied

By Amazon Customer

I got exactly what I payed for. The book arrived on time and was brand new. The supplementary online access was really helpful for reviewing topics that might be confusing. Its easy to understand and has lots of colorful graphics to enhance the learning experience. Perfect condition and shipping was great! This was my first time renting a textbook from here and I thought it'd be more of a hassle, but it was a smooth ride the whole way.

As listed, brand new.

By Emily

Exactly as listed, a lot of books in my experience are tricky when purchasing because the listing will say one thing but then you receive something not satisfactory. Came wrapped in a plastic covering to keep it clean while shipping which I appreciate. Will benefit me in my Nutrition course this year!

Good book

By Brandy

Good book, helped with my nutrition class.
