My 5 year old son loves this book, and ...

By Rosamond

My 5 year old son loves this book, and has learned a lot from it, reading it almost every night and telling me things he's learned about planets and space exploration. I would say the interest level is probably 1st to 3rd grade level generally, but my son really likes it anyway.

0 of 0 people found the following review helpful.

Cool Book!

By Jacintha Topaz

Awesome book -- every page full of colorful images, fun cool facts, and things I hadn't known about particular planets. Furthermore, there's an interactive digital book that goes along with the paperback version. Definitely worth checking out.

Book for my son

By Andrea Markosek

My son learned about planets this year in school and he became totally addicted to learning about space and planets. I bought him this book so he'd enjoy reading, and it did help with that! He and I read it over and over again!
