From Publishers Weekly

Specializing in the diagnosis and treatment of obsessive-compulsive disorder, psychologist Baer (an associate professor at Harvard) turns the spotlight on a little-known but common form of obsession, "bad thoughts." According to Baer, these "intrusive" thoughts fall into a few basic types: violent, sexual and blasphemous words, and images of a religious nature. Borrowing from Edgar Allan Poe, Baer blames such mental torment on "the imp of the perverse," that little devil inhabiting all human minds, cross-culturally and across time, "who makes you think the most inappropriate thoughts at the most inappropriate times." For most people, the imp proves no more than a "fleeting annoyance" most of the time, but for Baer's patients, these impish thoughts create extreme fear, guilt and worry. Attempting to suppress them only makes them stronger, leading the afflicted to avoid places, people and situations that provoke them. A new mother who obsessively thinks about harming her infant, for example, may increasingly avoid daily caretaking activities. Tending to be perfectionist and "overly conscientious," these people are highly unlikely ever to act on their bad thoughts, Baer explains. The most successful treatment, he says, involves desensitizing individuals by increasingly (and safely) exposing them to the situations that provoke their "bad thoughts"; cognitive therapy is also helpful for many patients. Finally, such prescription drugs as serotonin reuptake inhibitors, like Prozac, have also proved highly effective in the treatment of this disorder. With an easy-to-read style, Baer offers a comprehensive and accessible look at this fascinating topic. (Jan. 15)

THE IMP OF THE MIND: EXPLORING THE SILENT EPIDEMIC OF OBSESSIVE BAD THOUGHTS BY LEE BAER PDF

A leading expert on Obsessive Compulsive Disorder explores the hidden epidemic that afflicts millions of Americans.

In the first book to fully examine obsessive bad thoughts, Dr. Lee Baer combines the latest research with his own extensive experience in treating this widespread syndrome. Drawing on information ranging from new advances in brain technology to pervasive social taboos, Dr. Baer explores the root causes of bad thoughts, why they can spiral out of control, and how to recognize the crucial difference between harmless and dangerous bad thoughts.

An illuminating and accessible guide to the kinds of thoughts that create extreme fear, guilt, and worry, *The Imp of the Mind* provides concrete solutions to a tormenting and debilitating disorder. Including special sections on the prescription medications that have proven effective, it is "a beautifully written book that can be a great help to people who want to know what to do about obsessions" (Isaac Marks, M.D., author of *Living with Fear: Understanding and Coping with Anxiety*).

Great Book! Very Informative and Easy to Comprehend!

By Amber Redd

Lee Baer hits the nail on the head with this book. It's so hard explaining to people about this disease. They automatically assume that OCD is a perfectionist disease, characterized by order and incessant hand-washing. It is, in fact, so much deeper than that. The thoughts that prompt the compulsions are the real culprits. For someone with OCD, all it takes is one fleeting disturbing thought. Like fuel to the flame, the cause and effect scenarios ensue. The merciless rumination of one solitary thought augmented by irrationality. Temporary relief is only found by a fruitless compulsion, hand-washing, checking, avoidance, etc. It is a vicious cycle and a daily struggle for those afflicted. Everyone should read this book to gain better

perspective.

Good Book for folks with Obsessive thoughts

By Anna Aryeh

Folks who have thoughts running repeatedly through their mind will find comfort in knowing they are not alone. Thoughts like new mothers who worry they will harm their baby, or intrusive, inappropriate sexual thoughts or thoughts of violence. This isn't for folks who are psychotic. It is for regular people who are plagued by intrusive thoughts that they find upsetting. I am a mental health professional and I recommend it to my clients.
