THE MYSTERY OF E TROOP: CUSTER'S GRAY HORSE COMPANY AT THE LITTLE BIGHORN BY GREGORY MICHNO PDF

"If one were to buy one book dealing with the Custer fight and the recent archaeological discoveries, this is the one."--John Milton Hutchins, Denver Westerners Roundup

The men of Company E rode big gray horses that stood out amidst the confusion during the afternoon of June 25, 1876. Twenty-eight of these men were found dead in a ravine after the fighting ceased. But which ravine? Why couldn't the army find their bones only a few years later? Why didn't archaeological excavations uncover any remains? The answers, finally, are at hand.

Valuable for Understanding the Battle

By Gregor Gillespie

I found this book to be an excellent balance between archaeology and interviews from those that were at the battle. I provided all aspects of those interviewed, including those that conflicted with each other which I appreciated. It then went into possible reasons for the conflicts that made good sense. I do not agree with those that suggest it did not provide any conclusions as what the author thought was easily apparent to me. It also appeared to be substantiated by the archaeology. The book also went into a variety of methods that were used by the archaeologists to validate their information, including geology of the area and additional studies that were conducted to ensure as well as humanely possible that the information was accurate. Of course, the backdrop of this book was the battle itself and I felt it did a very good job of providing that information in a method that was interesting and as accurate as we can be as there were no survivors in the 7th that fought on that ridge that day. If you are interested in the Battle of the Little Bighorn or for that matter, battlefield archaeology, this is a very good book for your library. It is balanced, well researched, guides to so that you may make your own conclusion and balances the interviews from both sides of the conflict.
