Relevant for 90 years and still going strong!

By Teacher Coach

As satire goes, no one could shine a light on the backward traditions of educational perennialists. Just as relevant today as it was all those decades ago.

Does your school teach "fish grabbing with the bare hands"?

If you are in education--on either side of the desk, you will enjoy this old charmer. You will laugh at the longest bar in the world, Tequila Daisies, and all the notions they inspire about how education worked in the VERY old caveman days.

Teaching What matters

By TeacherMama

When I found this book on my list of items to read for a graduate course, I did not believe the reviews that stated a 70 year old book could still provide enlightenment on today's issues. Coming into the education field with a background in business, I found myself not only laughing throughout parts of the book but agreeing with the author. This book brought education and business together for me.

The author is correct, today we spend too much time focusing on what worked yesterday and not wanting to change. As a result, we make excuses on why what was still could be the answer. We are all realizing that yesterday's education is no longer effective for tomorrow's students. This book is one every stakeholder should read before voting on the latest "get fixed-quick" plans for education are initiated. While this book does not offer any suggestions on how to fix the system, it does offer an interesting viewpoint on how everything went so wrong. The question thus becomes who can come up with an answer to the questions this book poses.
