A very Powerful Technique that anyone can do

By Justin

I own one of Vianna's previous books, Go up and Work with God, and I've got to say this one is more than "expanded" as the title suggests. This is a whole new book, organized with way more flow and chalked full of 'extra' information and detail.

I personally use the technique taught in this book and learned it directly from the book. I took no course, just read the book and followed the instructions, it's that easy! I can feel tremendous energy and am having fantastic results!

Out of all the energy medicine books I've read this is the best. It's a hands on technique, little theory with a whole lot of practical.

Highly recommended for the beginner, novice and expert practitioner.

Best I've seen

By David

OK, there are misspellings and grammatical mistakes, big deal, the information is really neat, and more importantly, it WORKS. This book is packed with useful information. I read it 5 times through, getting useful stuff each time. I have been able to master her methods from the book, though I do also plan to take a seminar. I got more results faster with this book than any other. She doesn't just talk about feelings, she notes that you can download feelings you lack. This book, along with Richard Bartlett's Matrix Energetics: The Science and Art of Transformation, was highly recommended in a LOA course I took. I went back and forth between them, which helped me understand each of them better. No rehashes here, this lady got her stuff pure. I got a copy for my daughter, for someone at work, and for my wife. I sent copies of her previous books to other friends. I have one thing to say on this book: YEAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAA!!!!!! Now Vianna may perhaps have gotten somewhat too full of herself, in the last few years. She has detractors on the web. The book itself is good. I would probably not take any courses with Vianna, based on what her students have told me, but then again I don't need to, I have this book. Now you do have to enter into the Theta state, the zero point state, the state of pure consciousness, for any of this to work. The Secret of Instant Healing, The Physics of Miracles: Tapping in to the Field of Consciousness Potential, Dowsing and Manifesting, Healing with Quantum Energy and DNA Demystified, Volume 1: A Practical Guide to Reprogramming the 13 Helixes at Zero Point approach this subject from similar places. I tried the techniques myself, and they worked for me. The detractors seem to want to force every theory into their own little boxes. This doesn't work. You have to enter into the world of the author of any book, to understand it. When I was studying calculus, which I found difficult, I had to enter it from the textbook author's viewpoint, to do anything. I couldn't force that text into my own restricted ideas. Same with this. The people giving it high marks do so from inside the book; the detractors clearly never entered into what the book is talking about. Oh well. One energy/feeling I downloaded was for my life to be better than the best I could imagine, a la Neville Goddard. At work, they did a workload equalization, which I hadn't seen or heard of in 20 years. Things aren't perfect, but they are- yes- better than the best I could have imagined, when I started. When my newborn daughter was in the hospital, she was getting vaccines, which would give her high fevers, really high, enough that the nurses got really nervous. I alternated between Matrix Energetics and this book, as this was all I had to read for 3 weeks in the hospital as I stayed with my daughter- my wife was sick- and each time, the fevers went down. Of course this was no kind of medical treatment, only an altering of patterns, however I was very convinced the book was useful. Other problems just kind of melted away. This book, and the other books I've cited, are the first steps into the world of human scale Quantum Mechanics, out of the Cartesian/Newtonian paradigm that physics left over 100 years ago, but which society is only now starting to leave. Books on shamanic work make a lot more sense in the light of Theta Healing. Heck, there are

scientists who think we are only a bunch of chemicals. That's fine- but that is only their viewpoint. I want as many viewpoints as I can get- as with Neils Bohr's multi-model concept- so I can get some idea of what is real. This book helped and helps me.

Advance Healing Work

By Bea Shalla

Have you read Vianna Stibal's amazing books, Go Up and Seek God and Go Up and Work with God? Well, don't fret, this book is a compilation of those two plus a new healing modality on "feelings." That's right, this book contains guidelines on how you can download certain feelings you'd like to have.

This is advance healing work where you go to Theta (slow your brainwaves enough to completely connect with your subconscious) and change your mental programs. Why do I call this advance? The healing takes place in another plane, so you astral travel. You check the DNA codes (see it) and change it around to heal certain conditions like near sightedness, aging, etc.

With guidance from this book, anything is possible.

shanti,

Shalla
